

PRESS RELEASE

ISAGRO:

It is opinion of the Company that the current stock prices do not reflect the value of the Group

Milan, February 8th, 2016 – Isagro, with reference to the recent performance of its shares, showing an important penalization for both Ordinary and Growth Shares, within a context of low volumes, confirms that:

1. at the current market prices, the Company is priced less than the half of the book value of its Equity, with the latter, again as an opinion of the Company, largely lower than the actual value of its assets;
2. moreover, there is not rational motivation, thus based on reasons of patrimonial/financial order, for the presence of a spread between the price of the Ordinary Share and the price of the Growth Share.

Isagro, finally, reminds that on March 14th its Board of Directors shall take place, to approve the 2015 financials, with regards to which there is no element of “profit warning” versus what already communicated.

Isagro S.p.A. is the holding company of a group which, in twenty years, has become a qualified operator in the crop protection business, with global sales of around € 150 million and over 600 employees worldwide. Listed on the Italian Stock Exchange since 2003, Isagro is active in the innovative research, development, production and marketing, on a worldwide scale, of proprietary crop protection products, as well as in their distribution in some key markets.
