Optimal solution for soil bed protection

Dominus controls soil-borne pests and provides high return on investment for innovative growers focused on maximising crop yields.

Soil fumigants are the foundation of growers’ needs to secure excellent crop protection

Modern, innovative technology, excellent broad spectrum, for the control of key nematodes, weeds and soil fungi.

Dominus is a reliable product

Allows a shorter re-entry period between treatment and transplanting than competitors.

Selective for the crops where tested, showing no toxicity on all tested crops.
**Broad spectrum**

*Dominus* is effective against many kinds of organisms living in the soil and has multi-site action.

- **Nematodes** (Root knot, Root-lesion, etc.): *Meloidogyne* spp., *Globodera* spp., *Pratylenchus* spp., *Xiphinema* spp., *Trichodorus e Partrichodorus* spp.
- **Fungi** (Soil borne): *Fusarium*, *Rhizoctonia*, *Phytophthora*, *Pythium*, *Macrophomina*, *Verticillium*.

**Crops**

*Greenhouse vegetables*: Tomato, Strawberry, Cucumber, Pepper, Lettuce.

**Key advantages**

*Dominus* is delivered to the soil by the irrigation system. Drip irrigation takes place under sealed covers (TIF, VIF, PE films) limiting worker exposure during the application process.

**Drip application method phasing**

- **Soil preparation**
- **Drip irrigation system organization**
- **Plastic film spread up**
- **Soil must be properly irrigated to bring its moisture up to field capacity**
