

Grifon[®]

**BETTER PERFORMANCE
WITH LOWER DOSES**

SC Formulation

FUNGICIDES

**Copper hydroxide 136 g/l
+
Copper oxychloride 136 g/l**

➤ **Copper bioavailability**

Well balanced release of copper ions to hit the target.

HYDROXIDE: quick action

OXYCHLORIDE: long lasting activity

➤ **The only mixture of copper salts on the market**

Grifon is a patented mixture invented by Isagro R&D.

➤ **Easy to use**

Immediate dispersion and full compatibility with most products.

IMMEDIATE DISPERSION

Unique micro particles

> A loyal ally against many diseases

Crops: Grape, Tomato, Potato, Top fruits, Vegetables, Ornamentals, Tropical fruits.

Fungal diseases: Downy Mildew, Scab, Leaf Curl, Shot Hole, Early and Late Blight, Anthracnose, Blossom Wilt.

Bacterial diseases: Fire Blight, Bacterial Leaf Blight.

Grifon enhances the excellent antibacterial activity of copper.

> Multiple action

Inhibits fungi spores' germination

Blocks the pathogen respiration processes

Slows down protein biosynthesis

Reduces membrane permeability

The unique Isagro synthesis process means the copper microparticles are the perfect size to target the bacteria.

> Selectivity

Grifon does not have any known phytotoxic effect when applied following label recommendations and dose rates.

> Rainfastness

The **Grifon** formulation contains a much higher number of copper particles less than one micron in size than other formulations on the market. This enhances rainfastness.

> Resistance management

Optimal partner of other fungicides for **resistance management** programmes.
