

Neoram[®]

THE LONG LASTING COPPER FUNGICIDE

FUNGICIDES

WG Formulation

COPPER OXYCHLORIDE
375 g/kg

Fluid Bed Wettable Dispersible Granules

Neoram WG is produced in a dedicated plant with "FLUID BED" technology for an unsurpassed dispersibility in water and almost dust-less granules.

Selectivity

Neoram WG does not have any known phytotoxic effect when applied following label recommendations and dose rates.

Neoram[®]

The perfect granule

➤ Easy to use

Immediate dispersion of granules and full compatibility with most of the crop protection products.

➤ Many crops and a wide spectrum

Crops: Grape, Tomato, Potato, Top fruits, Vegetables, Ornamentals, Tropical fruits.

Fungal diseases: Downy Mildew, Scab, Leaf Curl, Shot Hole, Late Blight, Anthracnose, Blossom Wilt, Early Blight.

Bacterial diseases: Fire Blight, Bacterial leaf Blight.

Neoram WG enhances the excellent antibacterial activity of copper.

➤ Multiple action

Inhibits fungi spores' germination

Blocks the pathogen respiration processes

Slows down protein biosynthesis

Reduces membrane permeability

The unique Isagro synthesis process means the copper microparticles are the perfect size to target the bacteria.

➤ Resistance

Optimal partner of other fungicides for **resistance management** programs.
