

Siapton®

WORLD LEADER, A BENCHMARK OF THE
BIOSTIMULANT SECTOR

Plant stimulant

BIOSTIMULANTS

➤ Yield booster

One of the most imitated plant nutrients

Exclusive formula from Isagro

Optimizing the utilization of mineral nutrients

Unparalleled experience of uses from all over the world

➤ Anti-stress agent

Siapton helps to preserve crop yield at times of stress.

➤ Versatile and reliable

Siapton the choice of worldwide growers for decades.

➤ The ideal partner for modern agriculture

Siapton is a **top quality partner** to the most demanding growers to meet their challenging targets (yield quantity and quality) in a sustainable way.

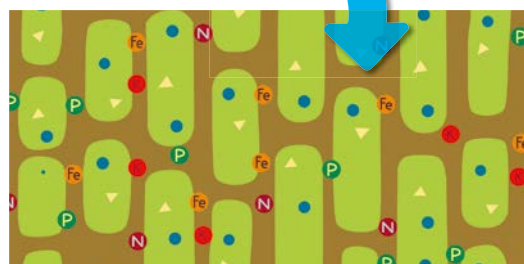

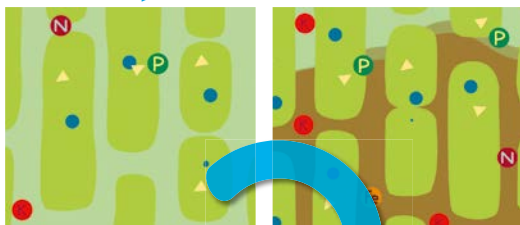

How Siapton works?

Siapton acts through metabolic mechanisms belonging to all plants.

ACTION 1

Siapton improves the uptake and utilization of nitrogen by **activating** the **enzyme systems GDH-NAD and NR**.

Without Siapton

With Siapton

ACTION 2

Siapton activates specific plant genes, so boosting anti-stress reactions for a quicker recovery of plant growth.

How to apply Siapton?

The product is applied at 1-3 L/ha by foliar application and at 5-10 L/ha by root application. It is applied at 7-15 days interval or during critical crop development stages (rooting, flowering, fruit sizing). As anti-stress apply before and/or following stress situations.

Siapton is a unique and exclusive Biostimulant from Isagro, a pillar among the Isagro Biosolutions portfolio. It was developed at our Research & Development facilities in Novara and Galliera, Italy, where dedicated scientists and researchers invent new solutions for farmers.
